## Who are we ?

Ecodis was created in February 2000 in Brittany (France) and specialized in the design and distribution of eco-friendly products towards organic stores.

Since 2007, Ecodis creates and develops new eco-friendly products (conception of products, ecological optimization, design and creation of packagings) under 8 of its own brands: Ah! Table!®, La droguerie écologique®, La droguerie écopratique®, Zélio®, Blue®, By Venga®, Anaé®, La belle Potagère®.

Our catalogue counts approximately 2 000 references distributed in 15 products lines for the person and the house equipment: kitchenware, household products, toilettries, bags, candles, textile, nursery items.

Today the company counts with more than 2 000 clients (distributors, stores, craftsmen) and employs about 70 persons.

For the selection and development of its eco-friendly products, Ecodis pays attention to a set of criteria and also to the European ecological labels (when they are available). Ecodis inquires about the whole composition of products and about the available ecological certificates (control of organic farming products).

We favor really useful products, with a long lasting life, being able to be recycled, reused, reloaded and having a low impact on the environment for the disposal (high rate of biodegradability, no toxic components...). We rather choose products elaborated from renewable raw materials or from recycled origin. Direct and undirect energy costs of products and waste caused

by their manufacturing are taken into account in the ecological evaluation of products. We also avoid products with too much packaging or with advertising without contents.

Our eco-friendly products are alternatives to the common business products and prove that it is possible to equip oneself at a reasonable price and live comfortably with solutions of global, ecological and social quality.

\* 100% of fibres are of certified organic origin.  
License n° 122176 - ECODIS

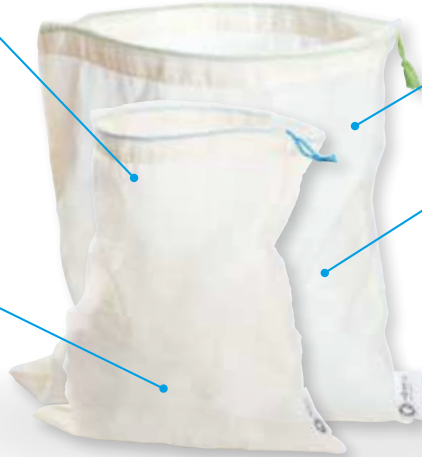

light, resistant and breathing fabric

multi purpose bags

Made in India. Organic cotton and ecological processing. GOTS certified. Washable.

washable and reusable

## For a better life without packaging!

**Best alternative to single-use plastic bags** as they are made of natural material, resistant, lightweight and reusable many times over. Our bags are the perfect partner to support your bulk sales and to naturally pack fruits & vegetables.

**All bags are GOTS certified** to guarantee the biological character of textile from the cotton harvest until the labeling as well as requirements on social criteria in the Indian factory.

**Highly resistant and lightweight.** Thanks to the special weaving we developed, our bags can hold until 2 kilos. They are designed to weight as less as possible on the scale not to pay additional cost due to their weight.

**Multipurpose product:** ideal to carry all your food, they can also be used in your everyday life: to stock food at home (cookies, rice, dried fruits...), to carry your children snacks, to protect underwear in your luggage...

**Large range of bags:** from 9x9 cm to 40x40 cm.

## Nigari salt

### Sel de Nigari

Nigari salt is an unrefined crystal of magnesium chloride extracted from a fossilized sea which covered part of the European continent 250 million years ago. Thanks to this recently discovered field, we can propose the first magnesium chloride coming from Western Europe.

**Uses:** preparation of tofu, salt alternative, magnesian water (Dissolve 20g - 2 full table spoons - in 1 liter of water), bath salt...

**Precautions:** Follow the instructions for use and take the right dosage. Please ask your doctor in case of kidney dysfunction or hypertension.

**Composition:** 99% minimum of hexahydrate magnesium chloride. Western Europe.

**Storage:** Keep away from humidity, heat and light. Make sure that you re-seal properly after each use.

## Do it yourself !

All of our powders are packaged in large kraft bags with a PLA interior, compostable bioplastic based on corn starch. The sticker on the bags can be detached to put on your bulk bin.

To avoid plastic, we chose to use a plant-based reusable and compostable kraft bag. It's practical, light, water-resistant and can be closed easily thanks to a strong zip. The kraft bags are labelled with the regulatory informations for each product.

## Powders

### Sodium bicarbonate

**DOV801** Sodium bicarbonate in bulk 10kg  
Multi-purpose product, very useful for a natural cleaning.  
Made in France.

**DOV801SAC** Compostable empty pack for sodium bicarbonate.

FR-NL-EN-DE-ES

### Highly concentrated detergent

FR-NL-EN-DE-ES

Anaé®

## Sodium percarbonate

### Citric acid

### Soda crystal

For these 3 products, it is mandatory to provide a suitable container to the customer. We have a complete solution with large formats as well as reusable empty containers labelled according to the different products.

All of our products are packaged in large size kraft bags with a PLA layer, a compostable bioplastic made from corn starch. The stickers on the bags can be taken off to be put on your bulk bin. To avoid plastic, we chose to use a plant-based reusable and compostable kraft bag. It's practical, light, water-resistant and can be closed easily thanks to a strong zip. The kraft bags are labelled with the regulatory information for each product.

#### DOV802 Sodium percarbonate in bulk 10kg

Very efficient stain-remover and whitener. Dangerous product: Read label before use.

#### DOV802SAC Compostable empty pack for sodium percarbonate.

#### DOV802EUSAC Compostable empty pack for sodium percarbonate.

## Eco-friendly toothbrushes with replaceable head at a small price!

Caliquo story started thanks to a discovery, one rainy day, in an old family house's attic. When Grégoire, an engineer who dreamed of being an inventor, found some old toothbrushes from the 19th century in some corner of his dad's attic, an idea started to sprout in his mind. He decided to bring back to trend sustainable and reusable toothbrush! Made of bioplastic, Caliquo's toothbrushes are eco-friendly. By using these toothbrushes with changeable heads, plastic waste is divided by 8: only 8g of plastic are thrown every year, which means less than a disposable toothbrushes. Soft and medium bristles choices are available to suit everyone.

- AE601** White bioplastic toothbrush with changeable head, soft bristles FR-NL-EN
- AE621** White bioplastic toothbrush with changeable head, medium bristles
- AE602** Navy blue bioplastic toothbrush with changeable head, soft bristles

## GOTS

Beyond a requirement of natural fibers from organic farming, GOTS label includes strict environmental demands all along the confection chain as well as a demand on social criteria (wages, social guarantees...) for manufacturers. Labeling is specific and validated for each product to supply a reliable guarantee to the consumer.

Organic textile. Certificate issued by Ecocert Greenlife according GOTS standard available at <http://www.ecocert.com>.  
100% of fibers are of organic certified origin.  
License n°122176 - ECODIS

## COSMOS

COSMOS is an international label for cosmetics created by the organizations Cosmebio, Ecocert Greenlife, Ilea, BDIH and Soil association. This is the most demanding and the most complete requirements specification for ecological and organic cosmetics. It promotes the use of organic ingredients, production and transformation processes that respect the environment and human health and the integration and development of the "green chemistry".

## FSC®

This international label has objectives of preservation, sustainable exploitation, forests valorization and biotopes' and forest communities' respect. FSC® (Forest Stewardship Council) rules are the strictest in terms of forestry as well as in terms of social and environmental requirements.

## Natural Detergent / Ecodétergent

Ecocert has created two levels of labels for detergent products. Both of them aimed at a higher level than the French or the European regulation. The first level, "Natural Detergent", guarantees a real valorization of agro-resources and a real practice of environment care all along the production chain. The second level, "Natural Detergent with organic ingredients", imposes, on top of the first level, a minimum of 10% of organic ingredients.
